

VetLife™

Oral Care Spray and Gel (Veterinary Strength)

- 100% Natural, Doctor Formulated
- Works fast and naturally to help control plaque and tartar
- Helps control bad breath
- For Dogs & Cats --Especially Seniors
- Great For Maintenance
- Increase Profits: Great Margins

Try as a safer alternative for your senior patients!

"PetzLife Oral Care Products have worked on my patients that have had severe tartar and gingivitis - I have experienced an incredible safety record. I have used these products on patients with diabetes, heart disease, cushing disease and inflammatory bowel disease without incident - Keep up the good work PetzLife!"

Dr. Susan Maier (18 yrs. DVM, Horizon Veterinary Services)

Works on large Breeds!

"I much prefer dealing with tartar problems without anesthesia and PetzLife Oral Care products are simply the most effective that I have found - Thanks for a great addition to our Dental Tool Chest!"

Dr. Joanne Baldwin (30yrs. DVM, Cardinal Animal Hospital)

"We have long been very wary of repeated anesthetic procedures to clean our patients' teeth. In just a short time... we could visibly see improvement in the oral health of our patients, without having to rub and scrub their teeth. --- my staff and I are thoroughly impressed. --- breath is certainly improved. Kudos to PetzLife for a truly holistic approach to oral health in our pets!"

Dr. PJ Broadfoot (28 yrs. DVM, Holistic and Traditional Care)

Works on small breeds!!! This after only 3 weeks

Works better and faster than CET!

"I've been brushing with CET every other day and the results were not that good. I am now using PetzLife Products exclusively."

Introduction to Vetzlife

Our products are 100% natural, safe, and 100% guaranteed. There are 3 products: a spray, a regular gel, and a salmon gel. They are all the same, just a different way of delivering product. Products can be used on anything with teeth!

The Vetzlife oral care spray and gels kill the bacteria in the mouth and after using them twice a day for about 3-4 weeks; the tartar softens and is removed naturally. After about 2 weeks you can use your fingers with a soft cloth or a tooth brush to start to remove tartar. Once the teeth are at a desirable state of health, the product is used as maintenance 2-3 times a week.

Vetzlife is a great dental tool for veterinarians. It can be used on patients that have severe dental disease .Especially the patients that the vets are reluctant to sedate due to health issues, owner doesn't want to sedate, or owner can't afford a dental. This is a great, natural option for clinics and their clients. A lot of veterinarians are already using Vetzlife as a dental alternative when dentals are not an option, and as preventative care. How many clients have come back to clinic saying "I just had a dental done!" and the pet already needs dental health care? Veterinarians are dispensing post dental to keep teeth and gums healthy. And all client has to do is get it in the pets mouth 2-3 times a week- no need to brush it on!!

The list of ways to use Vetzlife goes on. (See Vetzlife Suggestions sheet) The vet clinic also makes 100% commission on EACH bottle!! We have clients calling us to find which clinic carries Vetzlife!

Petzlife Products, Inc
888-453-4682

VETZLIFE SUGGESTIONS

- Use for preventative on young pets- when they get their adult teeth
- For senior pets who are not able to handle anesthesia
- Pets with severe dental disease use *Vetzlife* instead of pulse dosing with antibiotics, no extreme fluctuation in bacteria levels in mouth every month
- Pets with dental disease use for 2-3 weeks before dental to help clean up teeth, get rid of bacteria so it won't be introduced into bloodstream during dental or as aerosol for dental technician
- Use 2-3 weeks before dental to remove tartar so teeth can be checked morning of dental to see if there are any underlying issues (slab fractures) etc that will need to be resolved. Saves time trying to get a hold of owner while under anesthesia-lowers anesthetic risk
- Use *Vetzlife* prior to dental (2-3 weeks), it can greatly shorten anesthetic time to clean teeth
- Use post-dental to prevent or greatly extend time between dentals
- For bad breath- kills bacteria on contact
- Great for rescue groups- saves money on dental cleaning or for rescue pets that are not well enough for sedation- for example: malnourished pets

ADDITIONAL PRODUCT INFORMATION FOR PETZLIFE

Vetzlife—**Salmon gel-** using a q-tip, submerge into gel to coat the q-tip and wipe into cat's mouth between cheek and gums, the dose on the bottle will make cats drool.
Also good idea for dogs under 4 lbs.

Gels—if pet doesn't like taste of gels, try putting on a small treat biscuit and turn treat over so gel is on bottom side of treat, then offer treat with gel to pet. Withhold water for half an hour after giving treat so gel will not be washed out of mouth.

--In warm weather keep gels in refrigerator, this will keep gel from separating

@Ease- try a pea sized amount between cheek and gum when using for the first time to see how pet reacts, if not enough to get desired relaxation, gradually increase to recommended dosage on bottle.

Ways to Market/Promote Vetzlife

There are many ways to market a product to a client, but for them to remember the information you have told them, they would need to have heard it 5 times. Here is a list of ways to get the information to clients:

- 1) Part of every physical exam is checking the health of the mouth. Vetzlife can help improve oral health care at every stage of a pet's life, from preventative on a puppy or kitten to an adult with severe periodontal disease. Recommending Vetzlife during annual exams gives clients more options for dental health care.
- 2) Have Vetzlife products and brochures in the exam rooms so you can show the client the actual products and give them the brochures. Most clients like the hands-on approach with products, they are more likely to use the product.
- 3) For every dental procedure: Mail out Vetzlife brochures with dental estimates and mailings, and on dental discharges
- 4) Any client requesting product to help with bad breath. Vetzlife is safe and 100% natural, kills bacteria on contact! Can avoid chemical additives to their drinking water!
- 5) Talk about Vetzlife at puppy/ kitten classes when talking about dental care, or new puppy/kitten appointments! Vetzlife is a great preventative for dental disease. The younger they start, the healthier they stay.
- 6) Offer anesthesia free scaling on mild tartar build up- Have owner use Vetzlife for 2-3 weeks twice a day, then come back in for technician to brush/pick off the loose tartar!! Clients will love not having to sedate their pets and you get to recheck the mouth when tartar is off!

VetzLife™

Oral Care Spray and Gel

About: VetzLife Oral Care Spray and Gel

Manufactured in an FDA registered facility

VetzLife Oral care Spray & Gel are 100% natural. They have been tested by an independent lab and found to be perfectly safe for your pets. There are no side effects and are even safe enough to use on people! The main ingredient in them is grapefruit seed extract. Here is the full list of ingredients: Grapefruit seed extract, Grape seed extract, Thyme oil, Neem oil, Rosemary oil, and Peppermint oil. These are all specially formulated with distilled water and grain alcohol to produce one of the most effective and safest dental products ever produced.

Product Safety, long term use, and clinical studies:

We asked Dr. Maier if she could make a statement about the safety of our ingredients especially grain alcohol, long term use, and how important Clinical Studies are to her.

Dr. Maier has been using VetzLife Oral Care for nearly 3 years in her clinic.

“I’m not really one for research data, I depend more on experience. This product has been available for more than long enough to establish an incredible safety record. I have dispensed this product to patients with diabetes, heart disease, Cushing’s disease, inflammatory bowel disease, etc. I have yet to see a problem in any of my patients that have used any of the Vetzlife Products. I have however in the majority of cases seen a remarkable improvement in their dental health.

Sincerely,

Dr Susan Maier (18 yrs Holistic Veterinarian)
Horizon Veterinary Services”

VetLife™

Oral Care Spray and Gel

Testimonials:

In our Integrative and Complementary Medicine practice we see many fragile, compromised animals. In treating so many with immune mediated disease, cancer, and metabolic disorders we have found that reduction of dental and gingival disease is critical in reducing antigenic stimulation and systemic inflammation. **Anesthesia for conventional dental procedures and prophylaxis is not always in the best interest of these animals; but we have to clean up their mouths and gums as quickly as possible to reduce the burden of infection on their systems.** The Petzlife products have been a huge help in making these animals healthier very quickly without compromising them in any way. They are well accepted by most animals (and owners.) **The speed with which they work is amazing and owners are very compliant when they see such rapid results.** Every animal in our practice has an exam and a recommendation for appropriate oral hygiene; it's a humane issue as well as a lifetime healthcare necessity and **Petzlife products make it easy for us to help all of our patients to be happier and healthier and to live longer.**

Judith M. Shoemaker, DVM (www.JudithShoemaker.com)

Always Helpful Veterinary Services

Internationally known practitioner and educator in complementary veterinary medicine and therapy. She has served as a board member and representative for AVCA, AAVA, IVAS, and AHVMA

I am a holistic veterinarian and am always in search of natural products for my patients. Vetzlife dental products have been a great addition. I feel like I have a new "tool" against tartar. In my 18 years in practice I have often seen older pets undergo anesthesia for dental cleanings or growth removals, and they were never the same afterwards. Some even developed seizures. VetzLife Oral Care products have worked on my patients that have had severe tartar and gingivitis. Before discovering these products we had to perform dental cleanings under anesthesia or resort to keeping the animal on antibiotics (As a holistic vet I don't use antibiotics very often). Now we can cure the problem while avoiding the anesthesia and the drugs !

This is an interesting comment by Dr. Maier --(she has been using our products for over 3 years in her clinic) pertains to questions concerned pet-owners and other professionals have had about our ingredients & clinical study's!

"I'm not really one for research data, I depend more on experience. This product has been available for more than long enough to establish an incredible safety record. I have dispensed this product to patients with diabetes, heart disease, crushing's disease, Inflammatory bowel disease, etc. I have yet to see a problem in any of my patients that have used any of the Petzlife Products. I have however in the majority of cases seen a remarkable improvement in their dental health.

Keep up to good work Petzlife.

Susan Maier, D.V.M.

Hi, Just wanted to drop a line to tell you how pleased I am with the VetzLife Oral Care products. I have received very encouraging feedback from my clients who have used it. I have also been using it on my own dogs and, even though I am not as "regular" as I should be with it, my 14 year old Havanese with 'sewer breath' (who sleeps on my pillow) has been a much more pleasant sleeping partner! I've been practicing veterinary medicine for over 30 years and, while I have not had any experience losing a patient during a dental procedure, I much prefer dealing with tartar problems without anesthesia when at all possible and the Vetzlife Oral Care products are simply the most effective that I have found, short of ultrasonic scaling. Thanks for a great addition to our dental tool chest!

Joanne V Baldwin DVM
Cardinal Animal Hospital

Dr. Joanne V. Baldwin is a 1973 graduate of Kansas State University. She has been practicing small and exotic animal medicine in Richmond, VA since 1974. Her goal is to educate animal owners to the needs of their pets to optimize the life of the pet and to make the most of the human/animal bond. Her focus is on a combination of conventional and holistic medicine to provide an opportunity for the animal's immune system to assist medical therapy. The ability to decide when to intervene and when to allow nature to do the healing is an integral part of the art of veterinary medicine. Doc raises and shows Havanese dogs and also belongs to Caring Canines visiting, as time permits, with Poppy and Pearlie. She and her longtime companion, Richi, live in Goochland with 4 adult Havanese, Poppy, Posy, Pearlie and Pala, and 3 cats, Willy, Rip and Cinder.

"I would like to commend VetzLife for a great group of products. We have long been very wary of repeated anesthetic procedures to clean our patients' teeth.

In light of some recent data, that showed brain cell damage due to anesthetics, we are even more aware of the potential toxicities, in addition to the already known anesthetic risks.

In just the few months that we have been stocking this, it has been flying off of our shelves, and we can visibly see improvement in the oral health of our patients, without having to rub and scrub their teeth.

my staff and I are thoroughly impressed. ----- breath is certainly improved.

Kudos to VetzLife for a truly holistic approach to oral health in our pets!"
PJ Broadfoot (26 Years DVM Holistic and Traditional Care)

Hello Bud,

This is Kevin from Maple Ridge Animal Clinic in Southbury, CT. I just wanted to let you know that Dr. Pezzullo, Dr Mullen and the Staff here love your VetzLife Oral Care products. Our clients rave about the product and tell us how easy it is to use.

Talk to you soon,

Kevin

Subject: Testimonial-

My name is Dr. Elizabeth Cohen and I am a pet owner, a practicing veterinarian for 21 years, a radio pet reporter, and the author of *Most of My Patients Wear Fur*. In chapter 4 of my book, I discuss the importance of oral hygiene. Brushing teeth at the puppy and kitten stage can help with teething, prevent many mouth problems and can even prevent heart, liver and kidney diseases later on!

I have 2 wonderful dogs that I love very much. The oldest is my black Labrador retriever, Allie. She is 18 years old and I am convinced she made it to such an old age because I do a lot of preventative care like daily teeth brushing. I have been brushing her teeth for many years now and luckily, she has good genes. I never had to perform dentistry on her. However, my 5-year old Rottie rescue, Roxy, is not as lucky. Even though she gets her teeth brushed daily, she must have lousy genes, because she still builds up some plaque and tartar. Performing a proper dentistry requires anesthesia and I do not want to put her under if I do not have to. No matter how many precautions are taken, anesthesia still poses a risk. This is why I am so excited about PetzLife oral care products. I love the fact that these products are all natural. They are so easy to use. Every night, (because my dogs are used to me brushing their teeth) I apply some gel on the toothbrush and brush the gel directly onto the teeth. In the morning, I take a piece of gauze and wipe the plaque and tartar right off. Wow! After using the product for just 1 week, I saw results.

Note: For patients that are not used to brushing, I suggest that you rub the gel liberally onto the teeth in the evening before bedtime, then wipe with gauze in the morning. After 1 week of doing this every night, you too should see a difference.

Some of you might be concerned about the grain alcohol in this product, but many liquid medications use the same grain alcohol that gets safely ingested by the patients. These oral care products get applied directly to the teeth, so if some gets swallowed there is no need to worry.

Thank you PetzLife for oral care products that help keep my pets and everyone else's, "Healthy and Happy!"

Sincerely,

Dr. Elizabeth Cohen

PetzLife @Eaze Testimonial

"The 1st time I used Petzlife @Eaze I was treating a patient (13 year old canine) with constant anxiety especially at night and was described by the owner as painful and so uncomfortable that the patient could no longer sleep through the night. After an exhaustive search for a medical cause, the patient was given pain medication and NSAID! (Steroid - Nermax). Neither medication made any difference. We decided to try PetzLife @Eaze and the difference was amazing. The patient's anxiety and restlessness decreased greatly and the owners now use PetzLife @Eaze consistently.

I highly recommend this holistic product in helping manage anxiety and stress for all pets."

Dr. Michael Drey, Jr. D.V.M

DOES YOUR PET SUFFER FROM ANXIETY?

DOES YOUR BEST FRIEND FEAR:

- Going to the vet?
- Thunderstorms?
- Car rides?
- Going to the groomer?
- Fireworks?

Or maybe develop anxiety when company comes over?

**THE LESS ANXIETY YOUR PETS FEEL,
THE LESS ANXIETY YOU FEEL!**

@-Ease is an ALL NATURAL calming support for pets. L-Theanine is a natural occurring amino acid found in green tea. It helps promote a restful relaxed state without causing reduced alertness. L-Theanine also helps your pet stay relaxed by stimulating its body to produce other calming amino acids, such as dopamine, GABA, and tryptophan. The intended use of this calming remedy is that of a mental and physical relaxant that does not induce drowsiness.

Based on clinical studies, L-Theanine's effect is felt within 30 minutes and lasts for a 6-8 hour period.

Product Safety

Grapefruit seed extract

Why Grapefruit Seed Extract?

After 25 years in use by naturopathic physicians, clinics and the general public grapefruit seed extract has been proven to be a safe and effective multipurpose (broad spectrum) compound with countless uses.

Grapefruit seed extract is being used successfully in humans and animals alike to fight many types of internal and external infections caused from parasites (single and multi-celled), viruses, bacteria, fungus and more!

The greatest benefit is due to its multipurpose (broad spectrum) effect. It is effective even if the causes of the infections are known, unknown or misdiagnosed. Grapefruit seed extract naturally detoxifies, enhances and supports the immune system.

The pure oil contains high levels of vitamin C and E, and bioflavonoid. The important substances have an antioxidant action and can neutralize free radicals that damage cells and cause a number of illnesses.

Another important benefit of grapefruit seed extract is that it is helpful in alkalizing the blood. Alkalizing the body fluids (raising pH) is one of the single most important health regeneration benefits available as disease causing microforms (fungi, bacteria, virus etc.) cannot survive in an alkaline oxygenated environment.

Grapefruit seed extract is effective at very low concentrations. During 1989-90, an international research team (reported in the Journal of Orthomolecular Medicine, Volume 5, No. 3, USA, 1990) examined the effects of GSE and compared this with 30 effective antibiotics and 18 proven fungicides. GSE was found to perform as well as any and all of the tested agents. Without the harsh side effects. It is a natural alternative to strong antibiotics.

Grapefruit seed extract is nontoxic. According to an independent laboratory testing "Acute Oral Toxicity", it would take at least 4,000 times the normal dose of gse to produce a 50% chance of poisoning (called LD50).

Because grapefruit seed extract does not exhibit the harsh side effects and high cost of pharmaceuticals it is becoming the alternative health choice for naturopathic physicians, clinics and the general public.

Internal uses include but not limited to: Digestive Upsets: Gastrointestinal Disorders, Diarrhea and Food Poisoning. Infections from: Parasites (single and multi-celled), Bacterial, Viral and Fungal. Candida Yeast Infections, Thrush and Chronic Fatigue. Oral Infections: Tooth Plaque, Gum Disorders, Breath Freshener and Mouthwash. Colds and Flu, Sore Throats, Strep Throat, Ear Inflammation / Pain, Gassiness, Sinusitis and much more!

WOW!!! And that is only the beginning!! Read On!!

Grape seed extract

Grape seed extract has gained in popularity over the years. It has been studied since the early 80's for its free radical scavenging effect and its ability to inhibit histamine. This free radical scavenging effect has demonstrated itself to be 20 times more potent than either vitamin C or vitamin E.

Therapeutic benefits have been shown to be dose dependent. Its usage is considered safe for conception, and pregnancy.

Grape seed extract is thought to neutralize free radicals (anti-oxidant), reduce inflammation, stabilize collagen and elastin, act as a natural antihistamine, and protect and heal connective tissue.

Neem Oil

The medicinal properties of Neem have been described in ancient Indian medical texts (4000 B.C.) such as the Atharva Veda, Ghrhyasutras and the Sutragranthas. The sanskrit name, nimba, is a derivative of the term nimbati syasthyamdadati - meaning 'to give good health'.

Literally, every part of the tree has a use. The products of the Neem tree are known to be anti-bacterial, anti-fungal and anti-parasitic.

Neem for viral diseases.

Neem has been used traditionally in India to treat several viral diseases. ----Neem extracts absorbs the viruses effectively preventing them from spreading over unaffected cells.

Recent tests have shown that Neem is effective against herpes virus and the viral DNA polymerase of hepatitis B virus.

Neem for respiratory disorders

Nose, pharynx, larynx, trachea, bronchi and lungs comprise the respiratory system. Commonest symptom found in many respiratory disorders like bronchitis, laryngitis, pharyngitis, tuberclosis, pleuritis etc is cough. Decoction of Neem is used as a antitussive for dry cough.

Even in Africa, Tropical America etc where Neem has been introduced in recent times, people have used Neem as herbal treatments for various ailments. A large number of medicinals, cosmetics, toiletries and pharmaceuticals are now based on neem products. Ancient Indian texts refer to Neem as Sarva Roga Nivarini, "the curer of all ailments."

Thyme Oil

THYME

Thymus vulgaris (Labiatae)

HISTORY AND USES

Thyme occurs in the west Mediterranean to the southwest Italy. The herb was known to the Sumerians, used by the Egyptians, Greeks and Romans. Thyme was praised by the herbalist Nicholas Culpeper (1616-1654) as "a notable strengthener of the lungs". Its main medicinal application is in treating coughs and clearing congestion. Many current formulas for mouth washes and vapor rubs contain thymol, one of the constituents found in thyme. It also improves digestion, destroys intestinal parasites and is an excellent antiseptic and tonic.

“Thyme will help alleviate sore throats and coughs. Not only will it ease the pain and irritation, the antiseptic component of thyme will combat bacteria in the throat.”
Our research indicates there have been many Medicinal Uses for Thyme oil. It is used as a powerful antiseptic, used in cases of anemia, bronchial ailments, and intestinal problems. It is used as an antiseptic against tooth decay!

Rosemary Oil

Rosmarinus officinalis (Labiatae)

HISTORY AND USES

Rosemary is native to the Mediterranean region. Rosemary is a well-known and greatly valued herb that is native to southern Europe. It has been used since antiquity to improve and strengthen the memory. Rosemary leaves increase circulation, reduce headaches and have anti-bacterial and fungal properties. Rosemary improves food absorption by stimulating digestion, the liver, the intestinal tract, and the gallbladder. It also is used in antiseptic gargles for sore throats, gum problems and canker sores. Rosemary has a long-standing reputation as a tonic, invigorating herb, imparting a zest for life that is to some degree reflected in its distinctive aromatic taste.

Peppermint oil

Mentha piperita (Labiatae)

HISTORY AND USES

Peppermint's origin is a mystery, but it has been in existence for a long time - dried leaves were found in Egyptian pyramids dating from around 1000 BC. It was highly valued by the Greeks and Romans, but only became popular in Western Europe in the 18th Century. Peppermint tea helps with indigestion and relaxes the muscles of the digestive tract. Peppermint's chief therapeutic value lies in its ability to relieve wind, flatulence, bloating and colic, though it has many other applications. Studies have shown that it relieves colon spasms and helps to cure ulcers. Peppermint also eases nervous headaches. Menthol, its main constituent, has antibacterial properties. Externally, the essential oil is used in balms and liniments to stimulate hot and cold nerve endings and increase local blood flow.

Now you know why our products really work, are safe and we can guarantee 100% satisfaction!!

An interesting comment is found on the Horizon Veterinary Clinic site by Dr. Susan Maier, DVM

"If a substance causes a symptom, it's homeopathic remedy can treat that symptom."
Now an interesting comment found in the Bible.

Ezekiel 47.12 (The Living Bible Version) First and last sentences -- "All kinds of fruit trees will grow along the river banks.--- The fruit will be for food and the leaves for Medicine."

VetzLife™

Oral Care Spray and Gel

Product Directions & Easy to Use Tips

Spray or apply gel directly on the largest area of tartar (see easy use tips).

You will notice your pet licking its lips repeatedly.

This helps mix the Oral Care with your pet's saliva and the natural ingredients will coat all surfaces of your pet's teeth and gums.

*1st 2 weeks use twice/daily if there is a heavy tartar build-up and/or red inflamed gums are present.

Otherwise, one application per day is normally all that is needed for moderate buildups.

*For best results, withhold food and water 30 minutes before and after applications. Nighttime is best so that VetzLife Oral Care can work all night.

*Brushing is not necessary but it will help accelerate the desired results.

The brushing action helps remove plaque and tartar that already has been softened.

Use soft or finger brush..... Or use a piece of gauze or tissue and wipe the teeth after 8 to 10 days

You will be amazed at how much of the plaque and tartar will come off.

*After 1 to 2 weeks, inflammation should subside and breath should be greatly improved. Generally, after 30 days, you can reduce applications to 2 or 3 times weekly for maintenance.

Easy To Use Tip

*If your dog does not want you in their mouth, just pat some gel on the outside of the lips and they will lick it, especially for small lap dogs; or, place a smear of peanut butter on their dish and squeeze the "Oral Care Gel" on top.

*For cats, put some gel directly on top of paws or on top of hind legs and they will lick it off. For more directions & great ways to use our products, go to our web site.

Gel Doses: Small dogs & cats 1/3 tsp.

Medium dogs 1/2 tsp.

Large breeds 1 tsp.

Spray Doses: Pet under 12 lbs. – 2 sprays

Pet 12-35 lbs. 3 sprays

Pet 30-60 lbs. 4sprays

Large breeds 5-6 sprays

Note: If your pet pulls back from an application, it is not hurting them they are just not used to the taste.
